

WORK NOTICE MARINA BAY – WEST SHORES RICHMOND, CALIFORNIA

June 2006

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work within the Marina Bay Redevelopment Project located in Richmond, CA (see map on back). The parcel is located south of Hall Avenue, east of Marina Way and west of Marina Bay.

On April 24, 2006 DTSC approved the Soils Management Plan (SMP) for the removal of stockpiled soil at the West Shore Area. The SMP addresses the removal of 6,500 cubic yards of stockpiled soil. 2,500 cubic yards of soil is categorized as hazardous waste with elevated levels of antimony and will be transported to a licensed hazardous waste landfill. 4,000 cubic yards of soil is categorized as non-hazardous waste.

Workers will be at the site beginning the week of June 12th between 8:00 A.M. and 5:00 P.M. The work will take approximately 35 working days. The following activities will take place.

- **Heavy equipment will be used at the site to excavate soil.**
- **Excavated soil will be loaded onto trucks and transported for offsite disposal.**
- **Trucks transporting excavated soil from the Site will travel on Marina Way South to Interstate 580.**
- **Soil will be kept damp to minimize dust during the excavation process.**
- **Dust monitoring will be conducted during excavation and loading activities.**
- **Trucks will be decontaminated and covered prior to leaving the Site.**

Work is being conducted in accordance with the approved 1993 Marina Bay Development Final Remedial Action Plan (RAP) and the approved 2006 Soils Management Plan (SMP). A copy of the RAP and the SMP are available in the Information Repositories listed below:
